

**CRESACADEMY** ▶ Experience-based learning

Introduction to

# PATIENT REPORTED OUTCOMES

Individual-focused class | 12 hours **Online**

## JOB DESCRIPTION

A Patient Reported Outcomes (PRO) specialist is responsible for the planning and execution of strategies to measure “what matters most” to patients and to support the development and implementation of PRO in clinical studies.

# LEARNING OUTCOMES:

This course will provide an introduction to patient-centred Clinical Outcome Assessments (COA), with a focus on Patient Reported Outcomes (PRO). The course will show you the benefit and challenges of the selection, development and validation of PROs in clinical research and clinical practice.

## ► STRATEGIC THINKING:

- Identification and critical appraisal of relevant PRO measures
- Evaluation of content validity and psychometric properties
- PRO challenges in clinical practice

## ► SOFT SKILLS:

- Stakeholders' management
- Strategy for implementation in healthcare services

## ► TOOLS:

- Online tools to support the identification of existing PRO measures
- Research guidelines for the development, evaluation and implementation of PRO measures
- Planning and management of the 3 Ts: Team, Task, Time

## OUR METHOD:

The course will be delivered online with experts in the identification, evaluation and implementation of PRO measures in clinical studies and clinical practice.

Our approach will strengthen your learning by:

- Defining challenges, best practice and guidelines
- Engaging in practical activities
- Supporting opportunities for discussion

## OUR FACULTY:

Our teachers are experts in the application of PRO measures and patient-centred research methodology in clinical studies, healthcare service studies and for regulatory submissions.

In addition to their teaching activities, our teachers have extensive international consultancy experience in clinical research, supporting pharmaceutical industries, academic institutions and healthcare providers.

CRES Academy is recognised for the quality of its courses, the experience of its teachers and for bringing to its students the most recent development and discoveries in clinical research.

## OPPORTUNITIES:

The online PRO training brought to you by CRES Academy will give you the knowledge and confidence to input and support the development of clinical studies within:

- Research Institutions
- CROs
- Patients Organisations
- Research Sponsors
- Consulting Agencies

## COURSE PROGRAM

### Day 1

- Patient-centred Research, Patient-centred Clinical Outcomes Assessments (COAs) and Clinical Outcomes Measures: Where do Patient Reported Outcomes (PRO) fit in?
- Stakeholders' use of PRO
- EMA and FDA Research Guidance on PRO
- PRO FDA Roadmap

### Day 2

- PRO tools for COA scientists
- PRO strategy
- Rare disease issues
- PRO in clinical practice
